Description:

Jay Berry Lee is happy until the summer he is 14 years old and discovers monkeys living in the creek bottoms near his parents' homestead. Set in the late 1800s, *Summer of the Monkeys* traces the boy's adventures as he attempts to capture 29 monkeys that have (it turns out) escaped from the circus. With somewhat dubious help from his grandfather, and over the objections of his mother, Jay goes about discovering that monkeys are much smarter and harder to catch than he thought possible. Woven into this story is a second theme about his physically disabled sister and the family's attempts to find money for an operation. As funny and touching as Wilson Rawls's , this book will appeal to the young reader who has always wished for the freedom to run wild through the woods with nothing more pressing to do than find another rabbit hole--or escaped monkey. (Ages 12 and older) --Richard

Farr --This text refers to an out of print or unavailable edition of this title.

From the Publisher *Monkeys Out In The Middle Of Nowhere Staring At Him!*

A tree full of monkeys the last thing fourteen-year-old Jay Berry Lee thought he'd find on one of his treks through Oklahoma's Cherokee Ozarks. Jay learns from his grandfather that the monkeys have escaped from a circus and there is a big reward for anyone who finds them. He knows how much his family needs the money. Jay is determined to catch the monkeys. It's a summer of thrills and dangers no one will ever forget. --This text refers to the edition.
